

SLLS682F – JULY 2006 – REVISED MAY 2011

TPD4E001

4-CHANNEL ESD PROTECTION ARRAY WITH 1.5-pF IO CAPACITANCE

Check for Samples: TPD4E001

FEATURES

- 4-Channel ESD Clamp Array to Enhance System-Level ESD Protection
- Exceeds IEC61000-4-2 (Level 4) ESD
 Protection Requirements
 - ±8-kV IEC 61000-4-2 Contact Discharge
 - ±15-kV IEC 61000-4-2 Air-Gap Discharge
- ±15-kV Human-Body Model (HBM)
- 5.5-A Peak Pulse Current (8/20-us Pulse)
- Low 1.5-pF Input Capacitance
- Low 1-nA (Max) Leakage Current
- 0.9-V to 5.5-V Supply-Voltage Range
- Space-Saving DRL, DBV, DCK, and DRS Package Options

DESCRIPTION/ORDERING INFORMATION

Alternate 2-, 3-, 6-Channel Options Available: TPD2E001, TPD3E001, and TPD6E001 APPLICATIONS

- USB 2.0
- Ethernet
- FireWire™
- Precision Analog Interface
- SVGA Connections

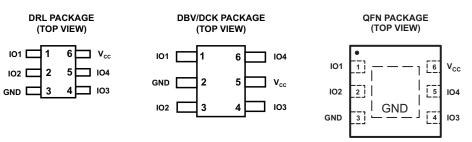

The TPD4E001 is a low-capacitance ± 15 -kV ESD-protection diode array designed to protect sensitive electronics attached to communication lines. Each channel consists of a pair of diodes that steer ESD current pulses to V_{CC} or GND. The TPD4E001 protects against ESD pulses up to ± 15 -kV Human-Body Model (HBM), ± 8 -kV Contact Discharge, and ± 15 -kV Air-Gap Discharge, as specified in IEC 61000-4-2. This device has a 1.5-pF IO capacitance per channel, making it ideal for use in high-speed data IO interfaces. The ultra low leakage current (<1 nA max) is suitable for precision analog measurements in applications like glucose meters, heart rate monitors, etc.

The TPD4E001 is available in DRL, DBV (SOT-23), DCK (SC-70), and DRS (QFN) packages and is specified for -40°C to 85°C operation.

T _A	PACKAGE ⁽¹⁾		ORDERABLE PART NUMBER	TOP-SIDE MARKING
–40°C to 85°C	1.6 × 1.6 DRL	Reel of 4000	TPD4E001DRLR	2CR
	2.9 × 2.8 DBV (SOT-23)	Reel of 3000	TPD4E001DBVR	NFY5
	2.1 × 2.0 DCK (SC-70)	Reel of 3000	TPD4E001DCKR	2CF
	3 × 3 DRS (QFN)	Reel of 1000	TPD4E001DRSR	ZWM

ORDERING INFORMATION

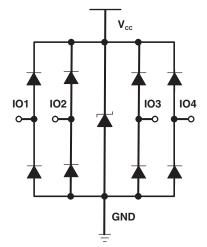

(1) For the most current package and ordering information, see the Package Option Addendum at the end of this document, or see the TI website at www.ti.com.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet. FireWire is a trademark of Apple Computer. Inc.

Figure 1. FUNCTIONAL BLOCK DIAGRAM

PIN DESCRIPTION

DRS/DRL NO.	DBV/DCK NO.	NAME	FUNCTION
1, 2, 4, 5	1, 3, 4, 6	IOx	ESD-protected channel
3	2	GND	Ground
6	5	V _{CC}	Power-supply input. Bypass V_{CC} to GND with a 0.1-µF ceramic capacitor.
Exposed Thermal Pad (DRS package only)		N/A	Exposed thermal pad. Connect to GND or leave floating.

Absolute Maximum Ratings⁽¹⁾

over operating free-air temperature range (unless otherwise noted)

			MIN	MAX	UNIT
V_{CC}			-0.3	7	V
V _{I/O}	IO voltage tolerance	-0.3	V _{CC} + 0.3	V	
T _{stg}	Storage temperature range	-65	150	°C	
TJ	Junction temperature		150	°C	
		Infrared (15 s)		220	°C
	Bump temperature (soldering)	Vapor phase (60 s)		215	
	Lead temperature (soldering, 10 s)		300	°C	

(1) Stresses beyond those listed under Absolute Maximum Ratings may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

TYPICAL OPERATING CHARACTERISTICS

SLLS682F-JULY 2006-REVISED MAY 2011

APPLICATION INFORMATION

Detailed Description

When placed near the connector, the TPD4E001 ESD solution offers little or no signal distortion during normal operation due to low IO capacitance and ultra-low leakage current specifications. The TPD4E001 ensures that the core circuitry is protected and the system is functioning properly in the event of an ESD strike. For proper operation, the following layout/ design guidelines should be followed:

- 1. Place the TPD4E001 solution close to the connector. This allows the TPD4E001 to take away the energy associated with ESD strike before it reaches the internal circuitry of the system board.
- Place a 0.1-μF capacitor very close to the V_{CC} pin. This limits any momentary voltage surge at the IO pin during the ESD strike event.
- 3. Ensure that there is enough metallization for the V_{CC} and GND loop. During normal operation, the TPD4E001 consumes nA leakage current. But during the ESD event, V_{CC} and GND may see 15 A to 30 A of current, depending on the ESD level. Sufficient current path enables safe discharge of all the energy associated with the ESD strike.
- 4. Leave the unused IO pins floating .
- 5. The V_{CC} pin can be connected in two different ways:
 - (a) If the V_{CC} pin is connected to the system power supply, the TPD4E001 works as a transient suppressor for any signal swing above V_{CC} + V_F. A 0.1-μF capacitor on the device V_{CC} pin is recommended for ESD bypass.
 - (b) If the V_{CC} pin is not connected to the system power supply, the TPD4E001 can tolerate higher signal swing in the range up to 10V. Please note that a 0.1μF capacitor is still recommended at the V_{CC} pin for ESD bypass.

REVISION HISTORY

Changes from Revision C (April 2007) to Revision D	Page
Added DVB (SOT-23) Package and package information.	1
Changes from Revision D (December 2010) to Revision E	Page
Added DCK (SC-70) Package to Ordering Information table.	1
Changes from Revision E (April 2011) to Revision F	Page
Added Peak Pulse current and power values to ESD Protection Table	3
Added Peak Pulse Waveform Graph to Typical Operating Characteristics.	

PACKAGING INFORMATION

Orderable Device	Status ⁽¹⁾	Package Type	Package Drawing	Pins	Package Qty	Eco Plan ⁽²⁾	Lead/ Ball Finish	MSL Peak Temp ⁽³⁾	Samples (Requires Login)

⁽¹⁾ The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

⁽²⁾ Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes. **Pb-Free (RoHS Exempt):** This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and pa

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

⁽³⁾ MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

DBV (R-PDSO-G6)

PLASTIC SMALL-OUTLINE PACKAGE

- NOTES:
- A. All linear dimensions are in millimeters.
- B. This drawing is subject to change without notice.
- C. Body dimensions do not include mold flash or protrusion. Mold flash and protrusion shall not exceed 0.15 per side.
- D. Leads 1,2,3 may be wider than leads 4,5,6 for package orientation.
- È. Falls within JEDEC MO-178 Variation AB, except minimum lead width.

DCK (R-PDSO-G6)

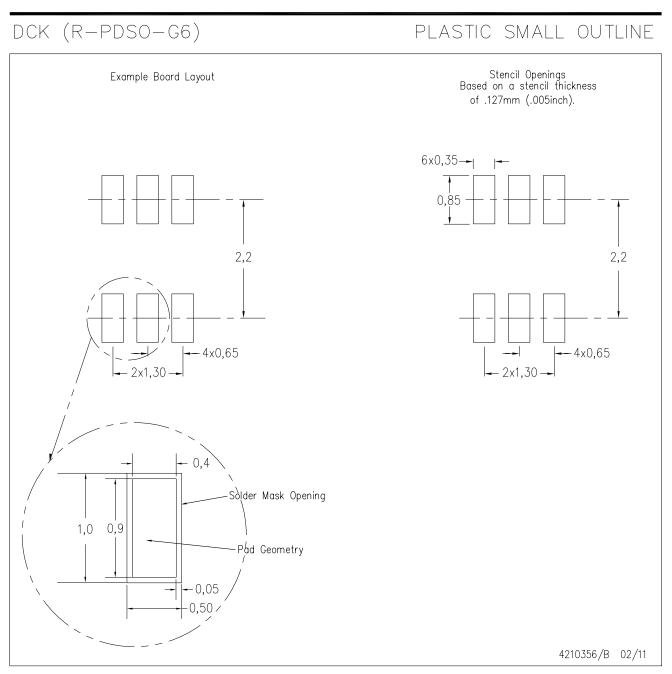

PLASTIC SMALL-OUTLINE PACKAGE

- NOTES: A. All linear dimensions are in millimeters.
 - B. This drawing is subject to change without notice.
 - C. Body dimensions do not include mold flash or protrusion. Mold flash and protrusion shall not exceed 0.15 per side.
 - D. Falls within JEDEC MO-203 variation AB.

LAND PATTERN DATA

NOTES:

- A. All linear dimensions are in millimeters.
- B. This drawing is subject to change without notice.
- C. Customers should place a note on the circuit board fabrication drawing not to alter the center solder mask defined pad.
- D. Publication IPC-7351 is recommended for alternate designs.
- E. Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Example stencil design based on a 50% volumetric metal load solder paste. Refer to IPC-7525 for other stencil recommendations.

DRL (R-PDSO-N6)

PLASTIC SMALL OUTLINE

NOTES:

A. All linear dimensions are in millimeters. Dimensioning and tolerancing per ASME Y14.5M-1994. B. This drawing is subject to change without notice.

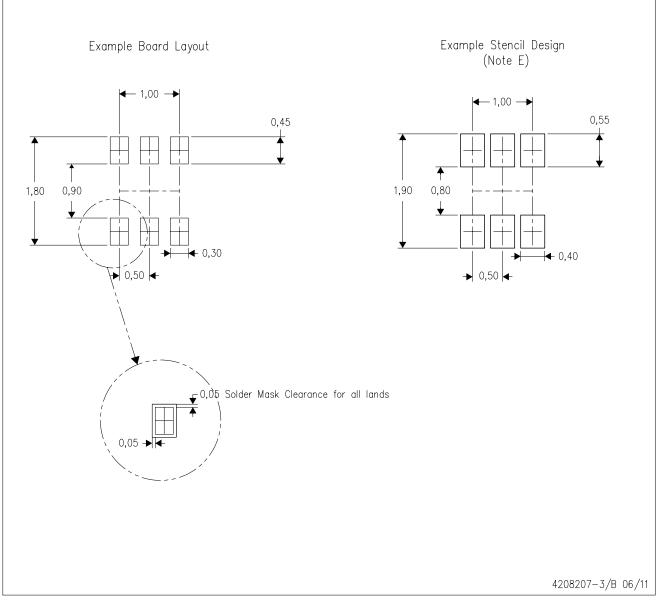

🖄 Body dimensions do not include mold flash, interlead flash, protrusions, or gate burrs. Mold flash, interlead flash, protrusions, or gate burrs shall not exceed 0,15 per end or side.

D. JEDEC package registration is pending.

DRL (R-PDSO-N6)

PLASTIC SMALL OUTLINE

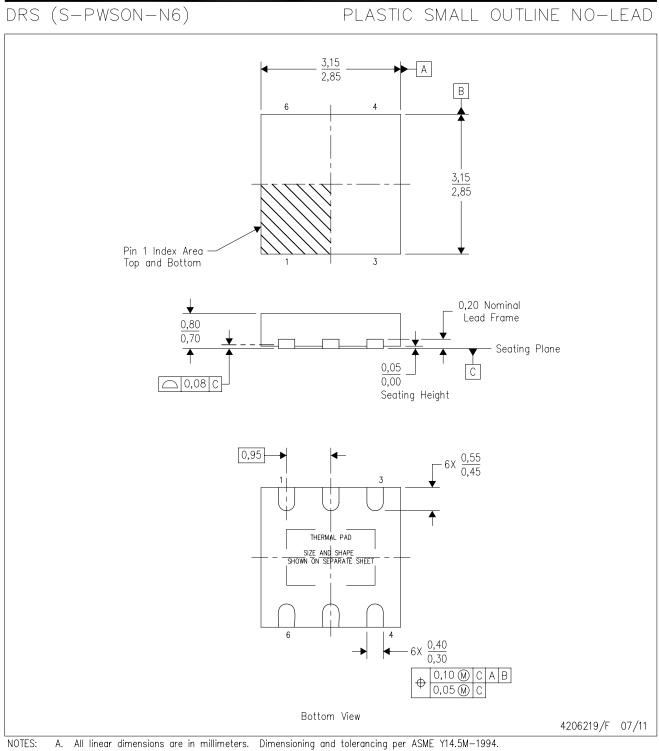

NOTES: A. All linear dimensions are in millimeters.

- B. This drawing is subject to change without notice.
- C. Publication IPC-7351 is recommended for alternate designs.
- D. Customers should contact their board fabrication site for minimum solder mask web tolerances between signal pads.
- E. Maximum stencil thickness 0,127 mm (5 mils). All linear dimensions are in millimeters.
- F. Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Refer to IPC 7525 for stencil design considerations.
- G. Side aperture dimensions over-print land for acceptable area ratio > 0.66. Customer may reduce side aperture dimensions if stencil manufacturing process allows for sufficient release at smaller opening.

MECHANICAL DATA

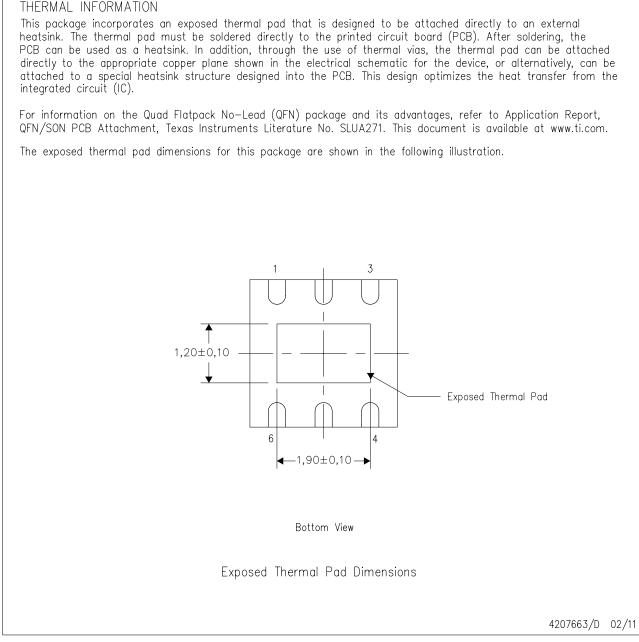

- Β. This drawing is subject to change without notice.
- SON (Small Outline No-Lead) package configuration. The package thermal pad must be soldered to the board for thermal and mechanical performance. C. D.
- See the additional figure in the Product Data Sheet for details regarding the exposed thermal pad features and dimensions. Ε.

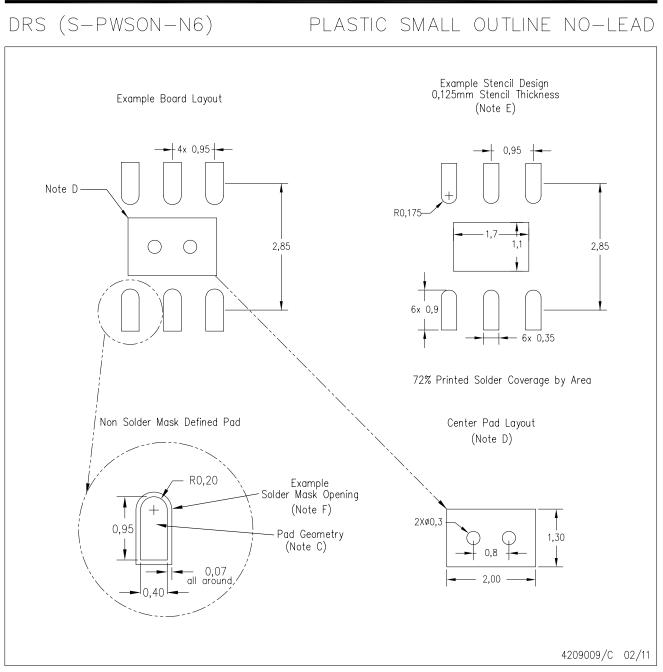

DRS (S-PWSON-N6)

PLASTIC SMALL OUTLINE NO-LEAD

NOTES: A. All linear dimensions are in millimeters.

- B. This drawing is subject to change without notice.
- C. Publication IPC-7351 is recommended for alternate designs.
- D. This package is designed to be soldered to a thermal pad on the board. Refer to Application Note, QFN/SON PCB Attachment, Texas Instruments Literature No. SLUA271, and also the Product Data Sheets for specific thermal information, via requirements, and recommended board layout. These documents are available at www.ti.com http://www.ti.com.
- E. Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Refer to IPC 7525 for stencil design considerations.
- F. Customers should contact their board fabrication site for solder mask tolerances.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
